

# Guidelines for e-posters

## **GENERAL INFORMATION**

E-posters provide you exceptional flexibility and ease of design, given that they can be prepared using Microsoft PowerPoint (or similar applications). Since the presentation is on large monitors and not on projection screens or flat panels, preparation differs from a presentation into a conference room. For this reason, make sure you make the most out of the new system and avoid overloaded or too minimal presentations.

## **PREPARATION - DESIGN**

The e-poster must be in .jpg format.

You can create your presentation by choosing one of the suggested PowerPoint templates of the congress (study or case report), but you must save (or export) it as jpg, and double-check on a computer other than yours that it is functional.

You are kindly requested to upload your e-poster in jpg format.

E-posters are displayed on 55" screens with full HD resolution (1920x1080) pixels and a widescreen ratio of 16:9, so the image files must have 16:9 ratio and at least HD resolution (1280x720) up to full HD (1920x1080) at 100 - 150 dpi (these settings are already incorporated into the provided PowerPoint templates).

Regarding which font to use, keep in mind that it is much safer if you prefer the default fonts, like Arial, Tahoma, Verdana etc.

The required arrangements according to the above settings are the following:

### **FONTS**

---

#### **Title of the slide:**

The recommended size is  $\geq 25$ pt

#### **Authors & Affiliations**

The recommended size is  $\geq 9$ pt

#### **Main text:**

The recommended size is  $\geq 6$ pt

#### **Text in tables or figures:**

The recommended size is  $\geq 6$ pt

#### **Comments and references:**

The recommended size is 4pt to 6pt

## **STRUCTURE AND CONTENT**

The presentation should consist of **1 page (jpg format) using preferably the suggested ppt/pptx template (for a study or a case report accordingly).**

## **FIGURES AND TABLES (optional)**

If you wish not to include any figures or tables, you may delete the relevant boxes and adjust all the other boxes accordingly using more space and larger fonts for your texts.
