

SOLARIS

SOLARIS is a flexible self-expanding stent-graft, comprised of a durable electrospinning **PTFE** membrane encapsulating a **Nitinol** stent structure.

Precision
High Flexibility
Minimal Shortening
Balanced Radial Strength

Electrospinning PTFE membrane:
Multidirectional Resistance Force
with Instantaneous Sealing

Hydrophilic
Coating

3 Tantalum
Marker Bands
[Distal/Proximal]

Anti-Jump
Feature

Pullback
Delivery System

Atraumatic
Flexible Tip
